

Teaching: “Quantum Faith”

Quantum physics:

- In 1900 physicist Max Planck presented the theory to the German Physical Society.
- Quantum physics deals with physical phenomena on a nanoscopic (atomic) scale
- Based on the principle that matter and energy have the properties of both particles and waves.

/* We do not know what a particle or wave will do until the observer observes it */.

The faith principle: (a close comparison)

Our intellectual beliefs have no power in themselves, our beliefs must get into our heart, then we can speak them out and see results.

So then faith *comes* by hearing, and hearing by the Word of God, **Romans 10:17**.

Whosoever shall say unto this mountain, Be thou removed, and be cast into the sea; and shall not doubt in his heart, but shall believe that those things which he said shall come to pass; he shall have whatsoever he says, **Mark 11:23**.

Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you, **Matthew 7:7**.

Jesus said unto him, **If thou canst believe, all things are possible to him that believes**, **Mark 9:23**.

For to be carnally minded *is* death; but to be spiritually minded *is* life and peace, **Romans 8:6**.
